# DESIGN LAB

*Za każdym pomysłem stoi człowiek.*

Nasz zespół projektantów i konstruktorów tworzy Dział Rozwoju Produktu Nowodvorski Design LAB - serce marki, w którym kiełkują i dojrzewają wszystkie projekty.

Godziny rozmów, szkice i makiety - to one dają początek produktom, które zdobią Wasze wnętrza. Dopracowane wzornictwo, idące w parze z dobrze przemyślaną funkcjonalnością, zaowocowało kolekcją nagród międzynarodowej rangi. Jedną z nich jest The Red Dot Design Award przyznana za projekt lampy Q LED autorstwa Łukasza Jaworskiego.

Nieskończone pokłady kreatywności i uważność skierowana na użytkownika sprawiają, że nasze produkty wymykają się utartym kryteriom. Tworzymy nie tylko lampy, ale i światło, które pisze codzienne scenariusze.

*Behind every idea is a person.*

Our team of designers and constructors make up the Nowodvorski Design LAB Product Development Department - the heart of the brand, where all projects germinate and mature.

Hours of conversations, sketches and mock-ups - they give rise to the products that adorn your interiors. Refined design, going hand in hand with well thought-out functionality, has resulted in a collection of awards of international standing. One of these is The Red Dot Design Award, awarded for the design of the Q LED lamp by Łukasz Jaworski.

Infinite creativity and user-oriented attention make our products escape the usual criteria. We create not just lamps, but light that writes everyday scenarios.

10163

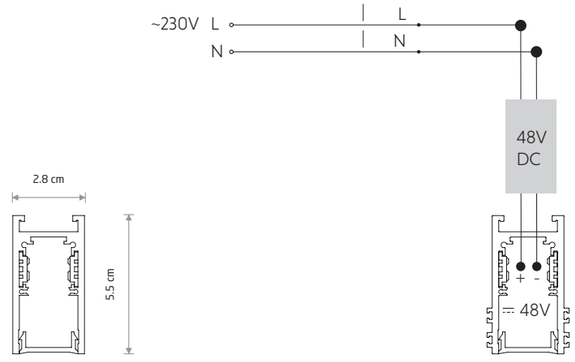
## Schemat zasilania / Power supply circuit diagram / Схема питания



System szynoprzewodowy (LVM) należy równomiernie obciążyć elektrycznie oraz równomiernie rozmieścić oprawy na jego długości.
Zalecany dystans pomiędzy mocowaniami max. 1000 mm.
Maksymalna długość systemu szynoprzewodowego z jednego źródła zasilania - 20 m.

The track light system (LVM) should be evenly electrically loaded and the fittings should be evenly placed along its length.
The recommended fastening distance is max. 1000 mm.
Maximum length of track light system with a single power source is 20 m.

Система трекового освещения (LVM) должна быть равномерно электрически нагружена, а светильники - равномерно распределены по ее длине.
Рекомендуемое расстояние между креплениями не более 1000 мм.
Допустимая макс. длина системы трекового освещения - 20 м.

## 1 LVM RECESSED TRACK 1M

aluminum

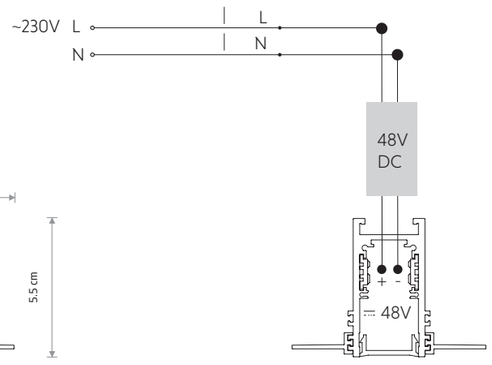
10156

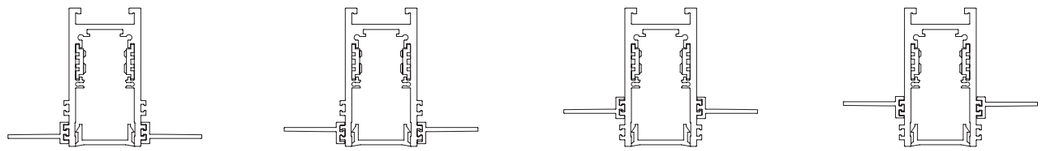
## 2 LVM RECESSED TRACK 2M

aluminum

10157

## Schemat zasilania / Power supply circuit diagram / Схема питания





Konstrukcja szynoprzewodów umożliwia dostosowanie wysokości skrzydełek do rożnych grubości płyt gipsowo-kartonowych.
Możliwa regulacja to: 3, 6, 12 i 14 mm.
System szynoprzewodowy (LVM) należy równomiernie obciążyć elektrycznie oraz równomiernie rozmieścić oprawy na jego długości.
Zalecany dystans pomiędzy mocowaniami max. 1000 mm.
Maksymalna długość systemu szynoprzewodowego z jednego źródła zasilania - 20 m.

The design of the track light system makes it possible to adjust the height of the wings for different thicknesses of drywall.
Possible adjustments are: 3, 6, 12 and 14 mm.
The track light system (LVM) should be evenly electrically loaded and the fittings should be evenly placed along its length.
The recommended fastening distance is max. 1000 mm.
Maximum length of track light system with a single power source is 20 m.

Конструкция трека позволяет регулировать высоту крыльев в зависимости от толщины гипсокартона.
Возможные регулировки составляют: 3, 6, 12 и 14 мм.
Система трекового освещения (LVM) должна быть равномерно электрически нагружена, а светильники - равномерно распределены по ее длине.
Рекомендуемое расстояние между креплениями не более 1000 мм.
Допустимая макс. длина системы трекового освещения - 20 м.

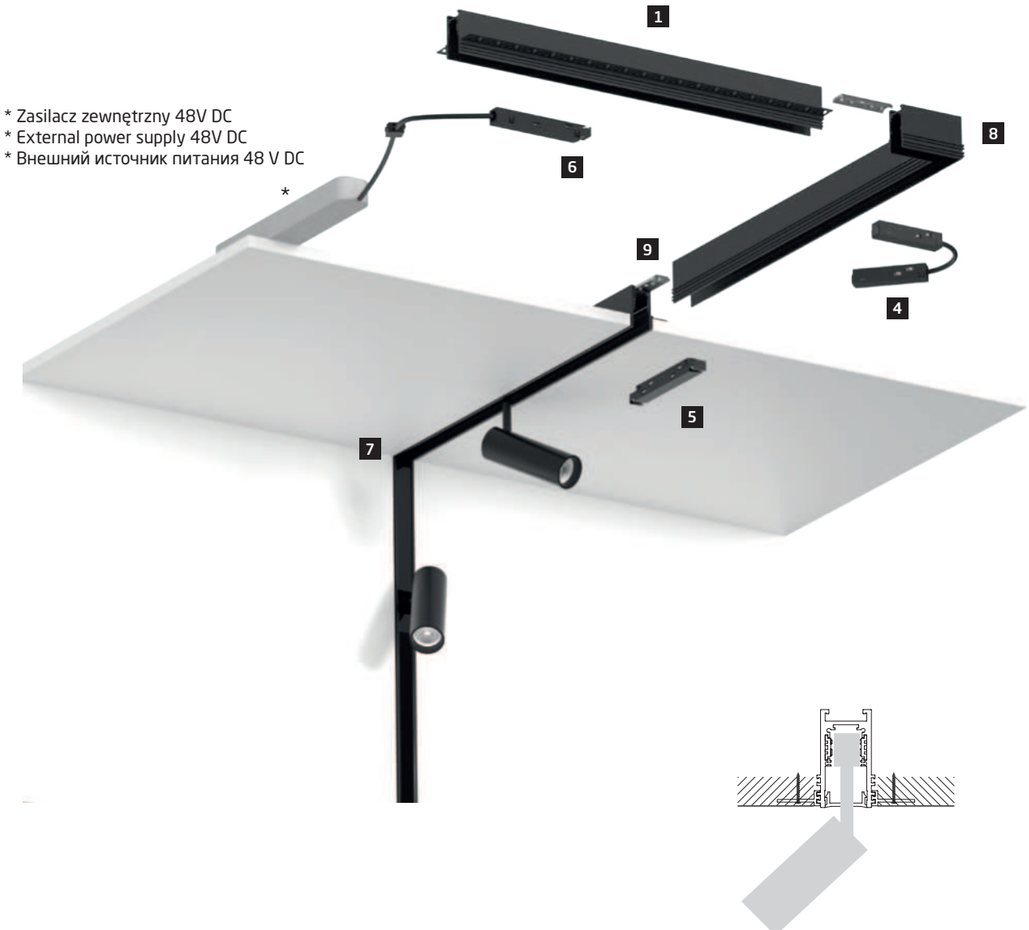
1. Montaż podtynkowy
1. Recessed mounting
1. Врезной монтаж



* Zasilacz zewnętrzny 48V DC
* External power supply 48V DC
* Внешний источник питания 48 V DC

* Możliwość zastosowania zasilacza zewnętrznego 48V DC.
  Zaleca się aby suma watażu użytych opraw nie przekraczała 90% mocy znamionowej zasilacza.
* Possibility of using an external 48V DC power supply.
  It is recommended that the total wattage of the luminaires used does not exceed 90% of the power supply's rated power.
* Можно использовать внешний источник питания 48 V DC.
  Рекомендуется, чтобы общая мощность используемых светильников не превышала 90% от номинальной мощности источника питания.

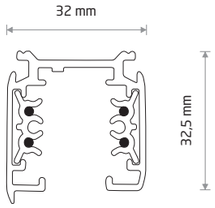
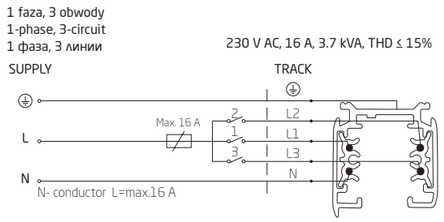
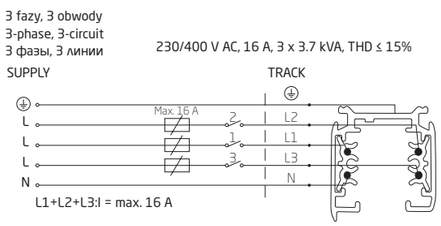
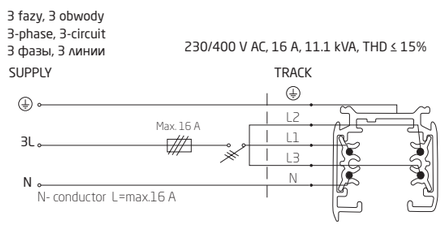
## Schematy zasilania / Power supply circuit diagrams / Схема питания









Maksymalna długość systemu szynoprzewodowego - 100 m.
Zalecany dystans pomiędzy mocowaniami max. 1000 mm.
System szynoprzewodowy (CTLS) należy równomiernie obciążyć elektrycznie oraz równomiernie rozmieścić oprawy na jego długości.

Maximum length of track lights system - 100 m.
The recommended fastening distance is max. 1000 mm.
The track light system (CTLS ) should be evenly electrically loaded and the fittings should be evenly placed along its length.

Допустимая макс. длина системы трекового освещения - 100 м.
Рекомендуемое расстояние между креплениями не более 1000 мм.
Система трекового освещения (CTLS) должна быть равномерно электрически нагружена, а светильники - равномерно распределены по ее длине.

## Schemat zasilania / Power supply circuit diagram / Схема питания

1 faza, 1 obwód
1-phase, 1-circuit

Zalecany dystans pomiędzy mocowaniami max. 1000 mm
Maksymalna długość jednego obwodu systemu szynoprzewodowego PROFILE - 20 m, a maksymalne obciążenie elektryczne - 1500W
System szynoprzewodowy należy równomiernie obciążyć elektrycznie oraz równomiernie rozmieścić oprawy na jego długości.

The recommended fastening distance is max. 1000 mm
The maximum length of one circuit of PROFILE track light system -20 m, and the maximum circuit power load - 1500W
The track light system should be evenly electrically loaded and the fittings should be evenly placed along its length.

Рекомендуемое расстояние между креплениями не более 1000 мм
Допустимая макс. длина системы трекового освещения - 20 м, максимальная электрическая нагрузка - 1500W
Система трекового освещения должна быть равномерно электрически нагружена, а светильники - равномерно распределены по ее длине

# INFORMACJE DLA KLIENTA / CUSTOMER INFORMATION / ИНФОРМАЦИЯ ДЛЯ КЛИЕНТОВ

## Informacje ogólne / General information / Главная Информация

Rzeczywiste parametry produktów mogą się różnić od wartości deklarowanych w katalogu o +/- 10%.

Zdjęcia prezentowanego asortymentu w niniejszym katalogu mają charakter poglądowy.
Rzeczywisty kolor produktów może nieznacznie odbiegać od prezentowanego na zdjęciach, ze względu na technologię druku.

The actual product parameters may differ from the values declared in the catalogue by +/- 10%.

Photos in this catalogue are for illustrative purposes only.
The actual color of the products may slightly differ from that shown in the photos, due to the printing technology.

Фактические параметры товаров могут отличаться от заявленных в каталоге значений на +/- 10%.

Фотографии представленного ассортимента в этом каталоге в качестве иллюстрации.
Фактический цвет продуктов может незначительно отличаться от представленного на фотографиях из-за технологии печати.

## Informacje techniczne / Technical information / Техническая информация

Temperatura barwowa (K) - w potocznym rozumieniu, to „kolor" światła białego emitowanego przez źródło, np. źródło LED.
W uproszczeniu możemy podzielić je na światło o:
· barwie ciepłej
· barwie neutralnej
· barwie zimnej

Colour temperature (K) in common understanding is the colour of white light emitted by a source, for example such as an LED source.
In simple terms, we can divide them into:
· Warm white
· White
· Cool white

Цветовая температура (K) в общепринятом понимании - это «цвет» белого света, излучаемого источником, например светодиодом.
Проще говоря, мы можем разделить их на:
· Теплый белый
· Белый
· Холодный белый

Strumień świetlny (lm/lumen) - w potocznym rozumieniu, to całkowita moc światła emitowanego z danego źródła światła.
Lumen (lm) – jednostka miary strumienia świetlnego w układzie SI
1 lm = 1 cd·sr

Luminous flux (lm / lumen) - the total power of light emitted from a light source.
Lumen (symbol: lm) - the unit of luminous flux in SI system.
1 lm = 1 cd·sr

Световой поток (лм / люмен) - общая мощность света, излучаемого данным источником света.
Люмен (лм) - единица светового потока в системе SI.
1 lm = 1 cd·sr

Natężenie oświetlenia (lx/luks) – w potocznym rozumieniu, to gęstość strumienia świetlnego padającego na daną powierzchnię.
Luks (lx) – jednostka natężenia oświetlenia w układzie SI.
1 lx = 1 cd·sr / $m^2$

Illuminance (lx / lux) - in common understanding, it is the density of the luminous flux incident on a given surface.
Lux (lx) - a unit of illuminance in the SI system.
1 lx = 1 cd sr / $m^2$

Освещенность (лк / люкс) - плотность светового потока на заданную площадь.
Единица освещенности в системе SI.
1 lx = 1 cd·sr / $m^2$

CRI (od ang. colour rendering index), Ra – wskaźnik oddawania barw charakteryzujący źródło światła, który określa, jak dobrze postrzegane są barwy oświetlonych przedmiotów.
Im wskaźnik ten jest wyższy, tym barwy są lepiej oddawane, a oświetlane przedmioty wyglądają naturalniej.
Wyrażony jest liczbą z przedziału od 0 do 100, gdzie 100 to światło słoneczne.
Minimum wg przepisów w UE dla opraw wewnętrznych to 80.

CRI- is an index of a light source's ability to reveal colours. It determines how well illuminated colours are perceived.
The higher index, the better colour rendering and the illuminated objects look more natural.
It is expressed with a number from 0 to 100, where 100 is a sunlight.
The minimum according to EU regulations for indoor luminaires is 80.

CRI (colour rendering index) Индекс цветопередачи, характеризующий источник света, который определяет, насколько хорошо воспринимаются цвета освещенных объектов. Чем выше этот индекс, тем лучше передаются цвета и освещенные объекты выглядят естественнее.
Он выражается числом от 0 до 100, где 100 - солнечный свет.
Минимальное требование ЕС для светильников для внутреннего освещения - 80.

## Stopień ochrony IP / Degree of protection IP / Степень защиты IP

Stopień ochrony jest wyrażony dwoma cyframi. Pierwsza oznacza ochronę przed ciałami stałymi. Druga to ochrona przed cieczami.

Degree of protection is expressed by two figures. The first one stands for protection against solid particles. The second one stands for protection against liquids.

Степень защиты выражается двумя цифрами. Первая цифра относится к защите от твердых веществ, вторая, к защите от жидкостей.

| 1 cyfra / 1st figure / 1-ая цифра | |
|---|---|
| IP0... | Brak ochrony / Not protected / Нет защиты |
| IP1... | Ochrona przed ciałami stałymi większymi niż 50 mm / Protected against solid objects greater than 50 mm / Защита от попадания твердых веществ ø 50 мм |
| IP2... | Ochrona przed ciałami stałymi większymi niż 12 mm / Protected against solid objects greater than 12 mm / Защита от попадания твердых веществ ø 12 мм |
| IP3... | Ochrona przed ciałami stałymi większymi niż 2,5 mm / Protected against solid objects greater than 2,5 mm / Защита от попадания твердых веществ ø 2,5 мм |
| IP4... | Ochrona przed ciałami stałymi większymi niż 1 mm / Protected against solid objects greater than 1 mm / Защита от попадания твердых веществ ø 1 мм |
| IP5... | Ochrona przed pyłem / Protected against dust infiltration / Защита от попадания пыли |
| IP6... | Ochrona pyłoszczelna / Totally protected against dust infiltration / Полная защита от попадания пыли |

| 2 cyfra / 2nd figure / 2-ая цифра | |
|---|---|
| IP...0 | Brak ochrony / Not protected / Нет защиты |
| IP...1 | Ochrona przed padającymi kroplami wody / Protected against vertically falling water drops / Защита от попадания капель воды в вертикаьном падении |
| IP...2 | Ochrona przed padającymi kroplami wody przy wychyleniu do 15° / Protected against falling water drops up to 15° from the vertical / Защита от попадания капель воды под углом не более 15° |
| IP...3 | Ochrona przed natryskiwaną wodą / Protected against rain / Защита от дождя |
| IP...4 | Ochrona przed bryzgami wody / Protected against splashing water / Защита от брызг воды |
| IP...5 | Ochrona przed strugami wody / Protected against water jets / Защита от струи воды |
| IP...6 | Ochrona przed falami / Protected against powered water jets / Защита от сильной струи воды |
| IP...7 | Ochrona przed zanurzeniem / Protected against temporary immersion / Защита от временного погружения |
| IP...8 | Ochrona przed głębokim zanurzeniem / Protected against continuous immersion / Защита от продолжительного погружения |

Oprawy oznaczone tym symbolem nie wolno okrywać materiałem termoizolacyjnym.
Fittings marked with this symbol must not be covered with thermal insulation materials.
Светильники, обозначенные этим символом, нельзя покрывать термоизоляционным материалом.

Klasa ochronna druga oznacza, że oprawa posiada podwójną izolację ochronną, a przewód ochronny (żyła żółto-zielona) nie może być podłączony do oprawy oświetleniowej.
Protection class II means that the fittings are equipped with a double protective insulation, and the green and yellow protective conductor must not be connected to the fitting.
Второй защитный класс обозначает светильник с двойной защитной изоляцией, а защитный желто-зеленый провод не должен подключаться к светильнику.

Klasa ochronna pierwsza oznacza, że oprawa musi być podłączona za pomocą przewodu ochronnego (żyła żółto-zielona) do przewodu lub zacisku uziemiającego.
Protection class I means that the fitting must be connected with the yellow and green protective conductor to the grounding wire or terminal.
Первый защитный класс обозначает, что светильник должен быть подключен с помощью защитного жёлто-зелёного провода к заземленному проводу или зажиму.

Klasa ochronna III oznacza, bezpieczeństwo elektryczne gwarantowane przez bardzo niskie zasilanie (poniżej 50 V). Bez uziemienia.
Protection class III means, that electrical safety is guaranteed by a very low power supply (less than 50 Volt). No grounding.
Класс III электрическая безопасность гарантирована подачей электроэнергии низкого напяжения (меньше чем 50 вольт).

Oprawy oznaczone tym symbolem wolno instalować wyłącznie na podłożach niepalnych.
Fittings marked with this symbol are suitable for installation only on nonflammable surfaces.
Светильники, обозначенные этим символом, можно устанавливать только на негорючих поверхностях.

Zgodność produktów z ukraińskimi normami.

Interior use only.
Для внешнего использования.

Do wewnętrznego użytku.
Exterior use only.
Для внутреннего использования.

Do stosowania wewnątrz i na zewnątrz.
Interior and exterior use.
Для внутреннего и внешнего использования.

Zużyte oprawy oświetleniowe są surowcami wtórnymi – nie wolno wyrzucać ich do pojemników na odpady domowe, mogą zawierać substancje niebezpieczne dla zdrowia i życia ludzkiego oraz środowiska. Zgodnie z dyrektywą WEEE 2012/19/UE użytkownik zobowiązany jest do oddania opraw do punktu zbierania zużytego sprzętu, co przyczyni się do ochrony środowiska naturalnego.
Used lighting fixtures are recyclable materials - they must not be disposed of in household waste containers as they may contain substances hazardous to human health or life as well as to the natural environment. In accordance with Regulation WEEE 2012/19 /EU, luminaire user is obliged to return a used lighting fixture to a waste appliance collection point, which will contribute to the protection of the natural environment.
Использованные осветительные приборы являются вторсырьем, их нельзя выбрасывать в контейнеры с хозяйственными отходами, потому что они могут содержать в себе вещества, опасные для здоровья и жизни человека, и вредные для окружающей среды. Согласно директиве WEEE 2012/19/UE, потребитель обязан сдать осветительные приборы в пункт сбора использованного оборудования, что положительно влияет на окружающую среду.
