PEOPLE

The value of a great team
At Faro Barcelona, sustainability starts from the inside, taking care of the well-being and personal growth of our team.

Equality and diversity
At Faro Barcelona all people are great and equal, whatever their gender, age, religion or sexual orientation. Women, as well as men, play an important role: 76% of our team and 49% of our leaders are women.

Community support
For over a decade, we have been collaborating in social projects of foundations such as Caritas or Royal Mc Donalds, providing our help to ensure a better quality of life for the people helped by these organisations. Since 2008, we have had our own social project with Hook, each luminaire sold feeds a child in Africa for one year.

Supporting new talent
We collaborate with universities and design schools to help new talents emerge into their professional development. Projects such as Reborn, a second life for waste (La LLotja), Design Make It with 3D printing (CIM UPC), are some of the collaborations we have carried out.

Social innovation
We take part in disruptive social innovation research and develop products and services that solve social problems such as the ageing of the population. We have a positive impact on people's quality of life, contributing to their well-being and comfort through quality, accessible and sustainable lighting and design.

El valor de un gran equipo humano
En Faro Barcelona la sostenibilidad empieza en el interior, cuidando el bienestar y crecimiento personal de nuestro equipo.

Igualdad y diversidad
En Faro Barcelona todas las personas son grandes e iguales, sean del género, edad, religión u orientación sexual que sean. La mujer, igual que el hombre, desempeña un papel importante: el 76% de nuestro equipo y el 49% de nuestros líderes son mujeres.

Apoyo a la comunidad
Llevamos más de una década colaborando en proyectos sociales de fundaciones como Cáritas o Royal Mc Donalds aportando nuestra ayuda para garantizar una mejor calidad de vida de las personas que ayudan estas organizaciones. Desde 2008, tenemos nuestro propio proyecto social con Hook, cada luminaria vendida alimenta durante una año a un niño en África.

Apoyo a los nuevos talentos
Colaboramos con universidades y centros de diseño para ayudar a los nuevos talentos en su desarrollo profesional. Proyectos como Reborn, una segunda vida para los desechos (La LLotja), Diseño Make It con impresión 3D (CIM UPC), son algunas de las colaboraciones que hemos realizado.

Innovación social
Participamos en investigaciones de innovación social disruptiva y desarrollamos productos y servicios que resuelven problemáticas sociales como el envejecimiento de la población.
Impactamos positivamente en la calidad de vida de las personas, contribuyendo a su bienestar y confort a través de la iluminación y el diseño de calidad, accesible y sostenible.

Our sustainability journey focuses on two main objectives: reducing our negative impact on the planet and maximising our positive social impact.
Nuestro camino hacia la sostenibilidad se centra en dos grandes objetivos: reducir nuestro impacto negativo en el planeta y maximizar nuestro impacto social positivo.

Sustainable packaging
At Faro Barcelona, we have a sustainable packaging decalogue. Our packaging is made of recycled cardboard boxes printed in one ink and without staples to ease the disassembly and the right recycling. We have eliminated single-use plastics and replaced them with recyclable paper bags and we use recycled cardboard shavings to protect the product during transport in 60% of our shipments. All our packaging meets Drop Test ISTA-2C quality standards to ensure products arrive in perfect condition.

More sustainable logistics and transport
We have optimised the packaging size of each product to reduce the amount of packaging material and the carbon footprint of transport. FMCG products are transported in stacks, which means a greatly reduced carbon footprint. We have opened a new logistics centre in China to supply our Asia-Oceania market in a more sustainable way and reduce carbon emissions from transport.

Sustainable workspaces
We use green electricity in our offices. We produce 70% of the energy we consume with our own photovoltaic installation, ensuring that the energy is from renewable sources. In addition, our headquarters are designed to maximise the use of solar energy and natural light.

Supporting new talent Team committed to sustainability
At Faro Barcelona we have an internal sustainability committee that promotes different sustainability actions and monitors them.

Embalaje sostenible
En Faro Barcelona disponemos del decálogo de embalaje sostenible. Nuestros embalajes son cajas de cartón reciclado impresas a una sola tinta y sin grapas para facilitar así el desmontaje y su correcto reciclaje. Hemos eliminado los plásticos de un solo uso y sustituido por bolsas de papel reciclable y utilizamos virutas de cartón reciclado para la protección del producto durante el transporte en el 60% de nuestros envíos. Todos nuestros embalajes cumplen los estándares de calidad de Drop Test ISTA-2C para asegurar que los productos lleguen en perfecto estado.

Logística y transporte más sostenible
Hemos optimizado el tamaño del embalaje de cada producto para reducir la cantidad de material de embalaje y la emisión de carbono derivado del transporte. Los productos de gran consumo se transportan apilados, lo que implica una gran reducción de huella de carbono. Hemos abierto un nuevo centro logístico en China para abastecer a nuestro mercado Asia-Oceania de una forma más sostenible y reduciendo las emisiones de carbono derivadas del transporte.

Espacios de trabajo sostenibles
En nuestras oficinas utilizamos energía eléctrica verde. Producimos un 70% de la energía que consumimos con nuestra propia instalación fotovoltaica, asegurando que la energía es de fuente renovable. Además, nuestra sede cuenta con un diseño pensado para el máximo aprovechamiento de la energía solar y la luz natural.

Equipo comprometido con la sostenibilidad
En Faro Barcelona contamos con un comité de sostenibilidad interno que promueve diferentes acciones de sostenibilidad y realiza su seguimiento.

PRODUCT

Sustainability from conceptualisation
In our eco-design decalogue we set out the main guidelines we follow to make our designs more sustainable. We work with external consultants to reduce the environmental impact of our production processes, guaranteeing the quality and safety of our products. We are training our design team in circular design techniques for the more sustainable development of all our products.

A longer useful life
We work to design timeless, repairable and long-lasting products in order to reduce their environmental impact. We research new methods to ensure that our designs last longer,are easier to repair and recycle.

Standardisation and modularity
We work on the standardisation of components for a more efficient use of resources and more sustainable production. We develop modular collections that allow us greater versatility and more efficient logistics and transport.

More sustainable processes and materials
One of the major challenges towards a more sustainable production is the choice of materials as it represents more than 70% of the product's carbon footprint. The use of recycled materials or materials with a lower environmental impact, the implementation of new techniques and the reduction of the number of materials used, help us to achieve more sustainable manufacturing.Control of the supply chain

We share our sustainability vision and commitments with all our suppliers.
We, therefore have a supplier code of conduct to ensure a more sustainable supply chain.

Sostenibilidad desde la conceptualización
En nuestro decálogo de eco-diseño recogemos las principales directrices que seguimos para que nuestros diseños sean más sostenibles. Trabajamos con asesorías externas para reducir el impacto ambiental de nuestros procesos productivos, garantizando la calidad y seguridad de nuestros productos. Estamos formando a nuestro equipo de diseño en técnicas de diseño circular para el desarrollo más sostenible de todos nuestros productos.

Una mayor vida útil
Trabajamos en el diseño de productos atemporales, reparables y duraderos con el fin de reducir su impacto medioambiental.
Investigamos nuevos métodos para garantizar que nuestros diseños sean más duraderos, fáciles de reparar y de reciclar.

Estandarización y modularidad
Trabajamos en la estandarización de componentes para un uso más eficiente de los recursos y una producción más sostenible. Desarrollamos colecciones modulares que nos permiten mayor versatilidad y una logística y transporte más eficientes.

Procesos y materiales más sostenibles
Uno de los grandes retos hacia una producción más sostenible es la elección de los materiales ya que representa más del 70% de la huella de carbono del producto.
El uso de materiales reciclados o con menor impacto ambiental, la implementación de nuevas técnicas y la reducción del número de materiales usados, nos ayuda a conseguir una fabricación más sostenible.

Control de la cadena de suministro
Compartimos nuestra visión y compromisos de sostenibilidad con todos nuestros proveedores. Por ello, disponemos del código de conducta de proveedores para garantizar una cadena de suministro más sostenible.

This year we have achieved certification of our carbon footprint calculation in accordance with the ISO14064-1 international standard, a major milestone on our path to sustainability.
Thanks to this certification, we know the real volume of greenhouse gas emissions generated by our activity and it allows us to identify areas for improvement and implement compensation strategies through different programs. through different programs.
Este año hemos logrado la certificación del cálculo de la huella de carbono conforme al estándar internacional ISO14064-1, un gran hito en nuestro camino hacia la sostenibilidad.

Why a Fan?

The ceiling fan has become an essential element in the interior design of a space, providing style, functionality, efficiency and sustainability.

El ventilador de techo se ha convertido en un elemento imprescindible en el interiorismo de un espacio, aportando estilo, funcionalidad, eficiencia y sostenibilidad.

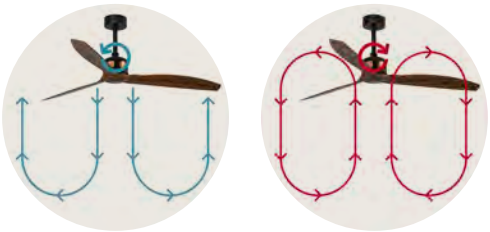

Healthy & environmental friendly
Saludable y sostenible

It improves the air quality and contributes to our well-being and health. It does not emit toxic gases dangerous to the environment.
Mejora la calidad del aire contribuyendo a nuestro bienestar y salud. No emite gases tóxicos.

Cost-effective
Eficiente

It ventilates and cool spaces with energy consumption 50% lower than other systems.
Ventila y refresca los espacios con un consumo energético un 50% más bajo que otros sistemas.

Summer and Winter use
Uso verano e invierno

The rotation of the blades creates a refreshing breeze in summer and eliminates air stratification in winter.
La rotación de las aspas crea una brisa refrescante en verano y elimina la estratificación del aire en invierno.

Size it to your space

Size is really important when selecting your ceiling fan. If a fan is too large, it can overwhelm the space. On the flip side, if the fan is too small, the airflow may be inadequate for that area.

El tamaño es realmente importante al seleccionar el ventilador de techo. Si un ventilador es demasiado grande, puede saturar el espacio. Por otro lado, si el ventilador es demasiado pequeño, el flujo de aire puede ser inadecuado para esa área.
