OUTDOOR LIGHTING

LUTEC Outdoor Lighting.

Designed to Be Seen.

LUTEC dares to be unique. With a European soul and a vision that blends elegance, innovation, and reliability, we design lighting that doesn't just brighten spaces—it elevates them. Here's why LUTEC stands apart:

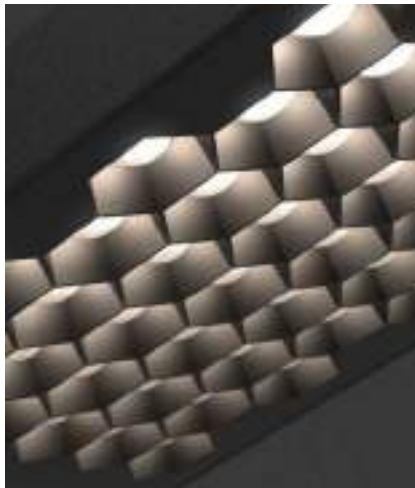

Original Design

Designed in Europe, every LUTEC light tells a story of creativity and character. Our ever-evolving collection has earned global recognition and awards, offering you exclusive designs that are as original as the homes they illuminate.

Better Weather Protection

With over 50 years of die-casting expertise, LUTEC lights are built to endure and designed to last. Offering industry-leading weather resistance, long warranties, and one of the lowest return rates worldwide, they shine on season after season.

Innovative Lighting

We craft clever lighting solutions for every space, combining the latest LED technologies with a broad range of applications, styles, and features—designed to bring light to every corner of your outdoors.

Easy Installation

We believe beautiful outdoor light should be easy to enjoy. That's why we design LUTEC products with practical, user-friendly features that make installation faster and easier—so you can focus on the atmosphere, not the setup.

HIGHLIGHTS **2026**

LUTEC ULTRA: WHERE TOP QUALITY MEETS DESIGN

LUTEC Ultra is our newest product line, crafted for professionals (or high quality seekers) who demand more from their lighting. This range combines durability, functionality, and European design for the most challenging outdoor environments.

Professional quality

Designed to meet the standards of professional installers, this new LUTEC range offers market-leading quality and straightforward installation, making it a smart choice for anyone who values long-lasting performance.

Resilient by nature

Backed by 50 years of outdoor lighting expertise, LUTEC Ultra sets a new benchmark for reliability. With IP65 ultra weather and coastal protection and a 10-year guarantee, it's built to last.

More light, more possibilities

Each product in the range is an all-in-one solution with three selectable light colours built in, with CCT switches included to let professionals adjust colour temperature for any project, quickly and on-site.

LUTEC design DNA

Made in Europe, LUTEC Ultra blends original, timeless design with style, convenience, and high performance in one distinctive range.

NEW LUTEC DESIGNS: THE YEAR OF THE **TWIST**

At LUTEC, we introduce fresh, original designs every year, bringing energy to the outdoor lighting market and ensuring customers always have trend-setting choices. This year's spotlight: three innovative concepts built around the art of rotation.

FARI: a duet of turning lights

Two sleek cube-shaped heads rotate independently, letting you shape light exactly as you want. Minimalist form, maximum versatility.

TWISTO: gentle twists of light

A bold, open-frame design with two rotating panels, each with its own light source. Create dramatic wall washes, focused beams, or soft ambient glows with ease.

DOMINO: a clever twist on geometry

A refined geometric block with a rotating front panel, directing light precisely for any situation.

COMPLETE **SOLAR SOLUTIONS** FOR EVERY NEED

With the widest solar lighting collection on the market, LUTEC covers every style, space, and application—offering high-quality products that outperform in brightness, autonomy and build.

All styles, all spaces

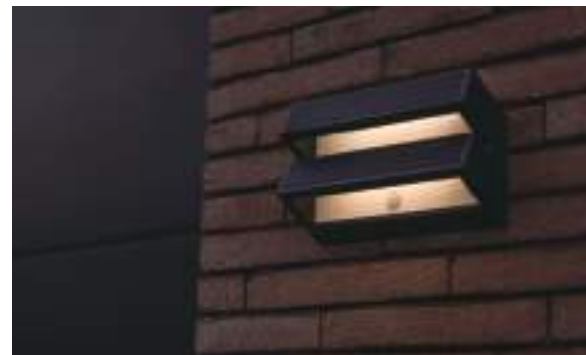

From technical to modern to traditional designs, our solar lights elegantly complement any environment.

Versatile by design

Choose from a wide variety of forms and functions, with or without sensors, to suit any outdoor application.

Quality that shines

Engineered for durability and performance, LUTEC solar delivers brighter light, longer autonomy, and consistent, energy-efficient illumination.

LUTEC: A RECORD YEAR OF AWARD-WINNING DESIGNS

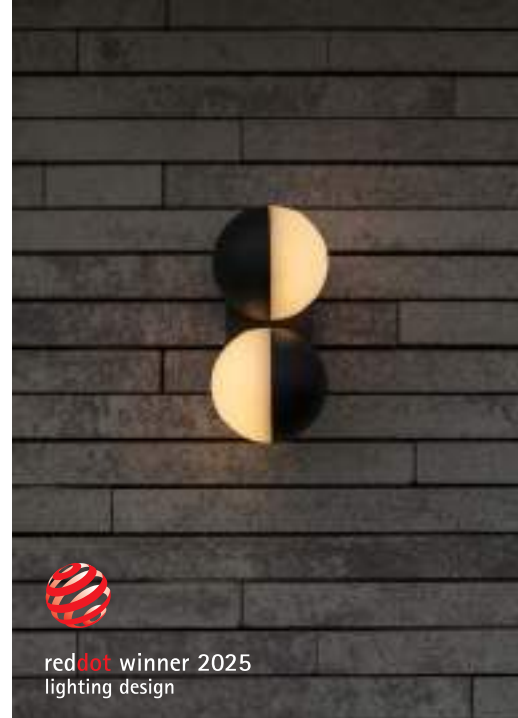

In 2025, LUTEC achieved a record harvest of **10 prestigious design awards** for our latest products—recognition of our commitment to innovation, quality, and aesthetics. These honors highlight our mission to fuse advanced technology with exceptional design.

Prestigious industry recognition

In 2025, LUTEC was honoured with the world's most respected design accolades: the Red Dot Design Award and the iF Design Award. Both are judged by international panels of independent design experts, who evaluate thousands of products from around the globe.

A commitment to design that shines

These awards confirm that LUTEC lighting excels in both visual distinction and performance, reinforcing our mission to set new standards in outdoor lighting design.

LUTEC solar

Finally solar lighting becoming smart!

solar

connected

- ☑ Energy saving
- ☑ Easy installation
no wires needed
- ☑ Higher lumen output
- ☑ Long life solar battery

- ☑ Easy to install,
connect and control
- ☑ Fast & stable bluetooth
connection
- ☑ Lights are connected to each
other via Bluetooth Mesh
- ☑ Range up to 50m
- ☑ Adjustable light settings
- ☑ Control by smart phone
or motion sensor

Control and adjust your SOLAR lights

Switch your lights on or off,
dim your lights, change the
temperature or the color
according to your mood.

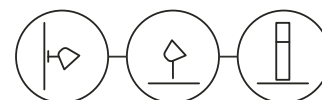

High tech low energy

Easy to control solar lights
for better efficiency
and comfort.

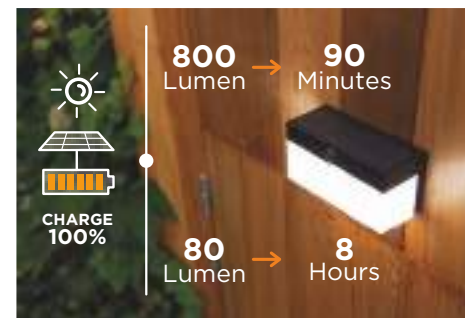

Create groups for more convenience

Control all your lights at once!
Easy and fast set up, you can
add or delete any light from
the group.

Manage the battery life

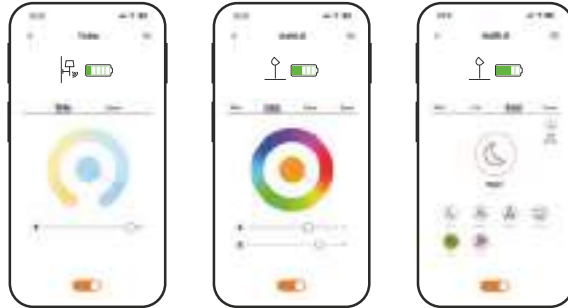

Check the battery level at any
time. At low battery levels,
switch easily from ON to PIR
or OFF mode.

Control and adjust your SOLAR lights

With the LUTEC connect App you can switch your lights On/Off, dim or change the color temperature easily.

The led color feature available in either the bollard or spike, allows you to create your own personalised garden atmosphere, designing your outdoor space in style with colors or dedicated scenes.

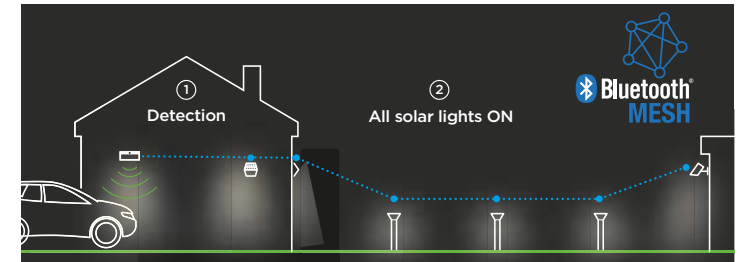

Create groups for more convenience

From first detection at your driveway or path create a group which allows all lights to illuminate

Create a group with the Solar connect light through the APP.

Thanks to Bluetooth MESH the lights can be easily linked and work simultaneously.

High tech low energy

Within the application you can select OFF-AUTO-ON mode. Selecting AUTO mode activates the movement sensor, which enables the light to come on only when someone is passing and increases battery life from a single charge.

From the sensor menu you can :

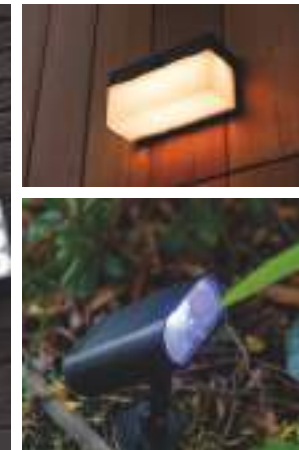

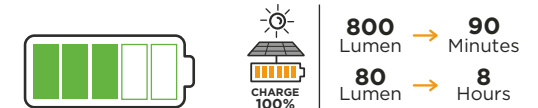

- Activate the detection from near to the sensor to further away
- Set Twilight mode from dusk to dawn
- Choose light reaction time from 10 seconds to 3 minutes
- Constant light : Additional option to set your light output at 20% and also duration from 2 to 8 hours.

Manage the battery life

This feature enables you to quickly check the battery level.

You can decide to increase or decrease the brightness or switch to AUTO mode or even Off, allowing full user control.

Visit our dedicated website which supports and inspires our consumers with their experience

LUTEC

sensor

security for your **comfort**

LUTEC presents the Sensor concept offering a complete range of Security Sensor Lights.

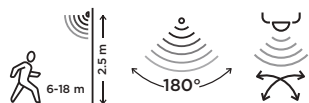

The range is featuring, besides the powerful flood lights with one or two heads, a number of very elegant designs which make a perfect match with the architecture of your house.

Passive infrared (PIR) motion sensor

How does it work?

A PIR sensor detects changes in the amount of infrared radiation and converts this changes into a switch-on signal.

When a person makes a movement within the detection reach, the sensor will detect a difference in infrared radiation in between the person's body and the environment.

Comfortable detection area

The detection area is a combination of the reach in distance and angle. An adjustable sensor can be tilted and/or turned and gives you full freedom.

Your personal settings

Time setting

As from the moment the sensor detects a movement the light stay on from 10 seconds upon 8 minutes according your preference.

Twilight setting

The environment brightness can be adjusted according your selection from night (10 lux) to daylight. In this way the light will switch into the "ON" position according the selected outside light level and not during the day.

Distance setting

You can limit the detection distance in accordance with the desired detection area. In this way you can avoid a movement detection outside your private grounds.

For your convenience

Dusk to dawn

Automatic light on switching as soon it's dark outside

Ambient Light

Light stays on all night long in a gentle ambient light, after movement detection the light switches on a powerful light beam.

Double sensor

Assures you a full detection not only frontal but also underneath the luminaire close to the wall.

Test mode

You can define the perfect detection area during installation in daylight situation

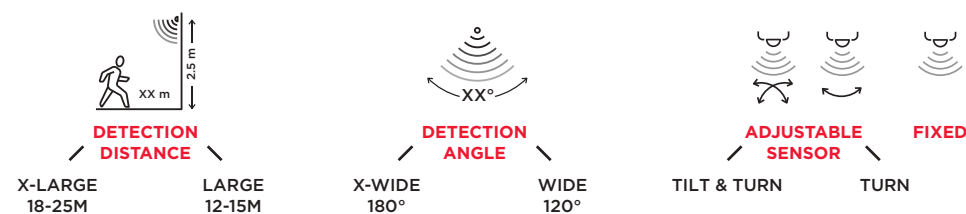

How to choose?

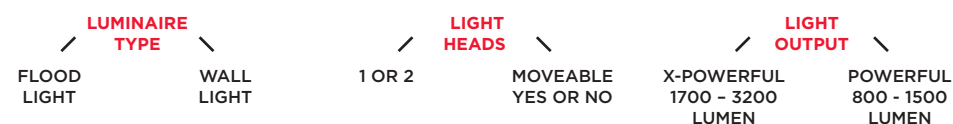

Check in a few steps which InMotion Security Sensor Light suits the best for your home situation.

Introducing our company

50 years of experience

The origins of a lighting company.

Originally set up as a national aluminum die-cast factory, we gained our first experience of outdoor lighting by producing bulkhead lights & classical garden lanterns. The first export shipment was made in 1996. The new factory in Yuyao became operational in 2001, concentrating on modern garden and professional lighting.

The LUTEC brand was launched in 2010, focusing on architectural LED lighting and the introduction of solar energy products. The success of the company resulted in the opening of a second production facility in 2012, fully devoted to future developments in design and new technologies.

Nowadays, lighting is both essential and magic.

The challenge of the lighting market is to create products which are a balance between the shape, impact and attractiveness. The LED revolution has completely changed the game, giving many new opportunities. Added to this we must not only continue to offer the latest technical innovations but also anticipate and provoke them, especially with solar energy and smart lighting controls.

We have expanded our international network and organisation: with new central warehouses in Belgium and China, establishing partners in many new countries allowing us to continue building our corporate identity and providing our partners with unique product support and marketing tools.

Welcome to the LUTEC center

Connected by lighting

The future is always here.

Today we are all surrounded by the interactive and connected world. For many reasons it is evident that the lighting market must also embrace this new internet age. The need of control and adjustments by means of an app or remote control has become a must have feature.

LUTEC offers multiple programmable solutions through the LUTEC connect app, for the Outdoor, Solar and Camera smart ranges.

Recently new developments in the SOLAR light domain have been introduced : Solar Hybrid & Solar Dynamic.

This is where the magic is born.

The LUTEC centre located our HQ in Yuyao is an international meeting venue where new concepts, innovation & strategies are studied, created, and shared with our partners. Recently, we've fully updated our showroom featuring attractive presentation of our new developments and actual ranges. You can obtain a sneak preview by scanning the QR code.

We provide an expert platform in design, sales and services. Staying close to our customers, allows the right design solutions to be found for their consumers.

Our team is trained to be proactive and reactive. The key to realise a win-win product, is to explore all the possibilities, look outside the box to find the best solution.

Design & engineering

Design, engineering & manufacturing, all interactive.

One of the main decisions we have taken in the LUTEC organisation is to break down the walls between of each department to improve product strategy.

This brings a culture of flowing communication between the services where everybody has a positive role to play in all projects.

We all know development is complex with many obstacles to overcome. However, working together helps our team to aim for the perfect solution as smoothly as possible. Knowledge is shared at all levels. Creativity, marketing, engineering, production, and sales are seen as one.

Warehousing & transport

Global logistic footprint assuring availability & proximity.

Unlike many other manufacturers in this sector, LUTEC keeps significant levels of finished goods in the central warehouses in Europe and China. Our aim is to reduce the lead time wherever possible.

The European Central Warehouse is now fully operational for more than 5 years, resulting in a proven logistic performance with a service level well over 93%. Overtime the ECW portfolio has increased up to 350 sku's with permanent availability.

Thanks to this warehouse located in Belgium, centrally situated in Europe, with an average lead time for most shipments is less than 7 days, the LUTEC products are always within reach.

We offer different transport options: direct shipment, cross docking, drop shipment or pick-up. this in close co-operation with each local LUTEC partner.

Recently we've arranged an appropriate set-up to assure different value adding trade marketing services in the ECW.

LUTEC quality

As a global supplier, our products are fully compliant with all relevant technical & quality requirements of the different regions in the world.

All LUTEC LED products benefit from a 5-years functional warranty. For the SOLAR range we apply a standard 2-years operational warranty.

LUTEC Warranty Conditions, please check on www.lutec.com/warranty

Integrated LED Light-engines

The LUTEC in-house engineering/production departments only use primary component suppliers, constantly improving the performance of the total LED product, resulting in a higher lumen/watt ratio.

Low Energy Cost: LUTEC products offer at least an 80% saving compared to traditional sources

Long Lifetime: up to 20.000 hours

LUTEC LED-light engines featuring the most appropriate characteristics in order to give the best result for all your outdoor applications.

- Lumen Maintenance: 100% LM-80 test report
- Color deviation: 100% under 5-step MacAdam ellipse

The LED driver is the heart of the LED module and is the main influencer of the life-time. LUTEC develops these drivers to the specification of the product for best performance. The production of the SMD's used in the LUTEC-drivers is done in-house in our approved SMT assembly lines. All drivers are compliant to all relevant standard and regulations.

Energy efficient LED lighting

Continuous improvement

LUTEC makes a continuous effort to improve the Energy Efficiency of their luminaires:

- Development of Solar ranges with zero energy consumption
- Introduction of retrofit items, suitable for Energy Class A LED light bulbs.
- Pushing the Energy Efficiency classes of the total portfolio from F-E-D to C-B-A level step by step.

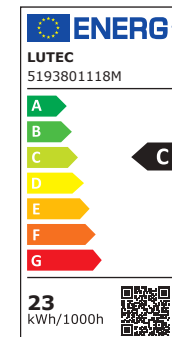

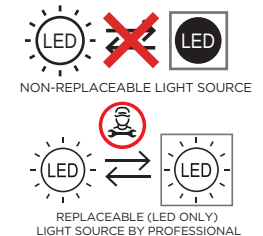

LUTEC Outdoor Portfolio

All LUTEC outdoor luminaires, within the scope of the updated EU-regulation 2021 are fully compliant. This results in the attribution of an updated classification with Energy Efficiency Classes in between A & G.

"Containing Products" Classification

The complete range of LUTEC luminaires has been classified as Containing Products with a removable and (non) replaceable LED-module. As a result the new Energy Efficiency Class is related to the LED-Module and not to the complete luminaire as such.

LED Module - Energy Efficiency Class

In order to make it clear that the test results are related to the LED Module, a specific EEL label was created with a "M" (Module) indication behind the item nr.

This EEL label can't be shown on the packaging of the complete Outdoor Luminaire. In the Instruction Manual we indicated the Energy Class of the concerned light Source (= LED Module)

EPREL Database

Consumers can access the database by scanning the QR code featured on the new energy labels. The EPREL database offers detailed information of all registered LUTEC products.

Available information on www.lutec.com

On our LUTEC website all related information is available for consultation and easy download of specific documents:

- Energy Label
- Instruction Manual
- Product Information sheet (with test results)
- Light Source Remove instructions

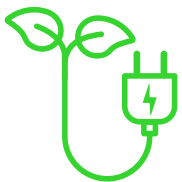

LUTEC Sustainable & environmental vision

We believe outdoor lighting is a unique category with a vast number of specific requirements and challenges. Our aim is to provide creative solutions, innovative designs using quality materials and products. Our categories include architectural designs with creative forms of illumination. Functional products, combining tough materials with stylish appeal, decorative products ranging from classic to ultra-modern shapes. Solar lighting that incorporates the latest trends alongside unique technologies. All this to support the ever changing climates around the world.

Our commitments to everyday actions

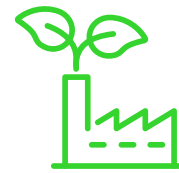

Durable Products

LUTEC outdoor luminaires are made from durable materials such as high density die-cast aluminium and synthetic glass, fully weatherproof, to **last for many years.**

Zero-Plastic Packaging

LUTEC has started the complete **ban of plastic bags** in their consumer packaging as from mid 2021.

Responsible Production & Operations

The roofs of LUTEC production facilities are equipped with high efficiency solar panels (10 000m²) resulting in a green energy saving : **50% of our annual energy consumption.**

Sustainable Functions & Features

LED Lights : 80% less energy vs traditional light sources

SENSOR Lights : consume energy only when you need light

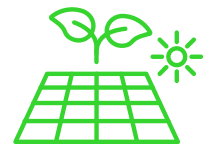

CONNECTED Lights : smart control of the lights can save up to 90%

SOLAR Lights : 100 % green energy

Focus on development of efficient and smart Solar luminaires made with panels :

- Without any rare earth element
 - Can be recycled and reused up to 4 times
- Last year, more than 400 000 homes were equipped with a new LUTEC Solar light.

Materials & finishes

LUTEC exterior luminaires are produced using high quality materials and finishes with excellent weather protection properties as well as mechanical strength to ensure a long lifetime.

Heavy duty die-cast Aluminum (ADC 12) with a thickness of 2mm, is in most cases the preferred material. The LUTEC in-house fully automatic powder-coating & water painting installation provides excellent protection against corrosion.

Different kind of durable synthetics, depending on the application and form factors. For the fixtures: ABS, a strong and light-weighted material, can be used under low and high outdoor temperatures. For the opal or transparent diffusers: the impact proof and very resistant PC (polycarbonate) is used. Also clear glass, tempered glass and opal or clear PMMA (plexi-glass) are common in our designs.

LUTEC benefits from an in-house tooling workshop for both aluminum and synthetic components.

IP rating table

The LUTEC Outdoor fixture comply to the International standards concerning Ingress Protection. All articles have a minimum IP44 rate. For some specific applications (Ex. in ground recessed spots) the protection rate goes up to IP67.

	Protection against solids		Protection against liquids
0	Not Protected	0	Not Protected
1	Protected against Solid Objects greater than 50mm	1	Protected against Dripping Water
2	Protected against Solid Objects greater than 12mm	2	Protected against Dripping Water when tilted to 15°
3	Protected against Solid Objects greater than 2.5mm	3	Protected against Spraying Water
4	Protected against Solid Objects greater than 1mm	4	Protected against Splashing Water
5	Dust Protected	5	Protected against Water Jets
6	Dust Tight	6	Protected against Heavy Seas
		7	Protected against the effects of Immersion
		8	Protected against Submersion

Mounting, installation & maintenance

Instruction Manual

LUTEC pays a lot of attention to a user friendly and effective yet simple instructions, we strive to find time saving methods of installation using uniquely designed interfaces where possible. Every LUTEC Outdoor fixture has a clear instruction manual in the unit box and this manual can also be downloaded from our website. Clear explanations in 16 European languages.

Service network

Our service network is available on global level through our LUTEC Partners. Contact details: www.lutec.com/services/global-network

LUTEC brand identity

Packaging

The LUTEC corporate identity has been invigorated in line with our evolving brand values. New trade support tools and POSs have been created to support our products and our customers providing an integrated selling solution, all of which adds value and distinguishes the LUTEC offer from our competitors.

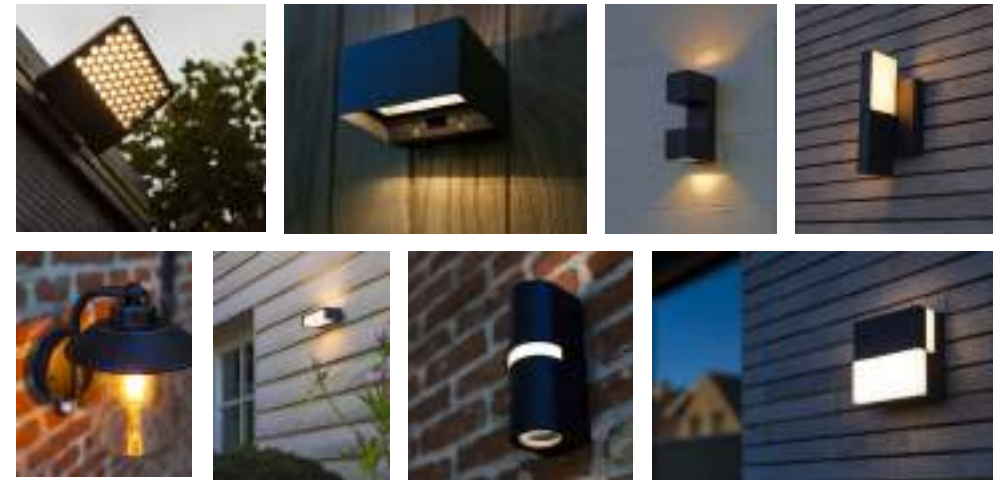

LUTEC applies on regular base graphic updates on the packaging of our complete portfolio, to improve the overall consumer perception and understanding. We believe the new look of the new packaging is fresh, vivid and in tune with our style of products. The product is always the hero with an inspiring photography. The LUTEC logo is visible from all sides of the packaging, together with the emblematic green banner this will further improve the brand recognition.

The LUTEC SOLAR and LUTEC SECURITY unit-box graphics were launched in the market for the LUTEC connect Solar and LUTEC connect Camera ranges. By means of a distinctive color indication, Orange for Solar & Red for Security, the consumers will easily recognize the difference with the standard LUTEC outdoor ranges.

LUTEC brand identity

Rich content

We're constantly creating new communication materials to support and improve the presentation of LUTEC products, facilitating an easy consumer selection of one of the LUTEC products. All support materials are accessible through our refreshed website www.lutec.com. Where you can find the LUTEC database with all kind of "rich content": Product photos, Lifestyle photo's, Tutorials, Inspirational video's, Flash-Intro video's, Unpacking experiences, and many more.
